Requirements

- send all files in highest resolution (minimum 44,1kHz - preferably 48kHz - 24bit)
- file format generally .WAV or .AIF
- leave a headroom between -3db and -6db
- make sure there is no master bus limiting or clipping applied
- If you are using heavy plug-in processing on individual channels or premaster processing on the master bus please make one version with and one without plug-ins.
- create a one-bar gap before and after your recording, do not fade out the file yourself
- turn off your dithering before exporting the files
- ensure that you name your tracks properly
- send all vocal files with AND without send fx like reverb, delay...etc (dry/wet)
- attach your latest rough mix (mp3 enough)
